Snow Well Service Acquisition Announcement

We are thrilled to announce that Q2 LLC has acquired the equity of Snow Well Service, thereby making it a proud member of the Q2 family as a wholly owned subsidiary of Q2 Artificial Lift Services. This acquisition marks a significant milestone in our journey, further solidifying our presence in the California market and strengthening our commitment to providing exceptional service to our valued customers.

With two prominent locations in Bakersfield and Taft, Snow Well Service brings with it a wealth of expertise and a team of seasoned downhole pump professionals. This addition to our roster enhances our capabilities and reinforces our position as a leader in the industry.

“We are excited about the acquisition of Snow Well Service and the opportunities it presents for our company” says Doug Quinn, Owner & President. “This strategic move aligns perfectly with our long-term goals and reinforces our commitment to delivering excellence in Rod Lift System Solutions.”

It is important to note that Snow Well Service will continue to operate autonomously as its own entity, managed by the same dedicated employees who have contributed to its success over the years. By operating under the Q2 umbrella, Snow Well Service will have access to additional resources and support, further enhancing its ability to serve customers efficiently and effectively.

Q2 Artificial Lift Services is a World Class Rod Lift System Solutions company that specializes in the sales, service, engineering, and manufacturing of down hole reciprocating pumps. We are a fully integrated company with over 45 repair and service [locations](#) strategically located across Western Canada and the United States.
